

OSSAI JOHN OSSON

Abuja, Nigeria (UTC+1)

+234 814 003 7556 | johnossai20@gmail.com | linkedin.com/in/john-ossai

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 5+ years of experience developing scalable web applications using modern JS frameworks like React, Angular, Nest, Express, and Vue.js. Expertise in optimizing application responsiveness while ensuring technical feasibility and adherence to UI/UX designs. Proven ability in writing modular code and mentoring teams to consistently deliver quality, efficient solutions.

CORE COMPETENCIES

- **Frontend Frameworks & Libraries:** Next.js, React, Angular, React Native/Expo, Redux, Zustand
- **Styling & Animation:** Tailwind CSS, GSAP, Framer Motion, Responsive Design, WCAG Compliance
- **Testing & Quality Assurance:** Vitest, Jest, React Testing Library, Automated Testing Frameworks
- **Backend & Database (Full-Stack Capability):** Node.js, tRPC, Zod, Supabase, Appwrite, PostgreSQL, Redis, Express
- **Development Tools & Workflow:** Git/GitHub, GitHub Actions, Vercel, Figma, Webpack, ESLint, Prettier
- **Architecture & Principles:** SOLID Principles, Design Systems, Component Architecture, Performance Optimization
- **Collaboration & Documentation:** Cross-functional Team Collaboration, Technical Documentation
 - **Core & Emerging Technologies:** HTML, CSS, Modern Frameworks, AI Code-generation, Claude Code

PROFESSIONAL EXPERIENCE

Energy Markets and Rates Consultants

Lead Frontend Developer & UI Architect

- Architected enterprise-grade frontend infrastructure utilizing Next.js and TypeScript to improve the technical feasibility of UI designs, while establishing coding standards for a 5-member team.
- Designed and implemented a modular component architecture with 40+ reusable components for desktop devices and streamlining collaboration with design teams to ensure consistent UI/UX patterns.
- Developed a custom CMS with TypeScript and Supabase, reinforcing full-stack capabilities and comprehensive documentation for new features and aiding in debugging and issue resolution.

Macgroup Technologies

Frontend Developer & Performance Engineer

- Achieved 59% improvement in First Contentful Paint (3.9s to 1.6s) through data-driven performance improvements.
- Maintained 97+ Lighthouse performance scores while implementing complex event-driven animations with Framer Motion.
- Established performance monitoring systems to track and resolve frontend bottlenecks proactively.

EDUCATION

Federal University of Lafia, Nasarawa State, Nigeria

Bachelor, Library and Information Science

- **GPA:** 4.46
- **Achievements:** Second-best student in faculty and department

CERTIFICATIONS

- Advanced Figma UI/UX Design (2025)
- Data Science and Machine Learning (In Progress, 2025)
- Continuously tracking emerging frontend technologies and frameworks

KEY ACHIEVEMENTS

- **Performance Champion:**Reduced First Contentful Paint by 59% through strategic optimization
- **Testing Advocate:**Implemented 300+ automated tests, reducing manual QA time by 35%
- **Architecture Leader:**Designed scalable component libraries used across multiple projects
- **Team Collaborator:**Maintained 100% sprint delivery across 10 consecutive cycles in distributed teams
- **Mentor & Leader:**Successfully trained 20+ developers with 90% project completion rate
