PROFESSIONAL SUMMARY

Results-driven Frontend Engineer with 5+ years of experience developing scalable, high-performance web applications using modern JS frameworks like React, Angular, and Vue.js. Expertise in optimizing user interfaces for speed and responsiveness while ensuring technical feasibility and adherence to UI/UX designs. Proven track record in establishing clean, modular code and mentoring teams to consistently deliver quality, efficient solutions.

CORE COMPETENCIES

- **Frontend Frameworks & Libraries:** Next.js, React, Angular, React Native/Expo, Remix, TypeScript, JavaScript (ES6+)
- **Styling & Animation:** Tailwind CSS, GSAP, Framer Motion, Responsive Design, WCAG 2.1 Accessibility
- **Testing & Quality Assurance:** Vitest, Jest, React Testing Library, Automated Testing Frameworks, CI/CD
- **Backend & Database (Full-Stack Capability):** Node.js, tRPC, Zod, Supabase, Appwrite, MySQL, PostgreSQL, NoSQL
- **Development Tools & Workflow:** Git/GitHub, GitHub Actions, Vercel, Figma, Webpack, Performance Monitoring Tools
- **Architecture & Principles:** SOLID Principles, Design Systems, Component Architecture, Event-Driven Architecture, Performance Optimization
- **Collaboration & Documentation:** Cross-functional Team Collaboration, Technical Documentation, Agile/Scrum Methodologies
- **Core & Emerging Technologies:** HTML, CSS, Modern Frameworks, AI Code-generation Tools

PROFESSIONAL EXPERIENCE

Energy Markets and Rates Consultants

Lead Frontend Developer & UI Architect

2024 - Present

Abuja, Nigeria

- Architected enterprise-grade frontend infrastructure utilizing Next.js and TypeScript to implement user-facing features and ensure the technical feasibility of UI designs, while establishing coding standards for a 5-member team.
- Designed and implemented a modular component architecture with 40+ reusable components, enabling responsive design across devices and streamlining collaboration with design teams to ensure consistent UI/UX patterns.
- Developed a custom CMS with TypeScript and Supabase, reinforcing full-stack expertise while facilitating technical documentation for new features and aiding in debugging and issue resolution.

Energy Markets and Rates Consultants

Lead Frontend Developer & UI Architect

2024 - Present

Abuja, Nigeria

- Enhanced accessibility and responsive design by driving WCAG 2.1 compliance, contributing to a 15% improvement in accessibility scores and ensuring browser testing best practices.
- Established comprehensive user engagement monitoring to capture key performance metrics, aligning frontend performance with SEO principles and achieving a 25% improvement in key performance indicators.
- Optimized front-end performance by applying advanced techniques to boost page load speeds and scalability, while conducting regular code reviews and debugging issues as they arose.

Energy Markets and Rates Consultants

Lead Frontend Developer & UI Architect

2024 - Present

Abuja, Nigeria

- Collaborated with cross-functional teams (marketing, product, design) to translate business requirements into technical solutions.
- Established frontend development standards and documentation, mentoring 3 junior developers on best practices.
- Drove project delivery by evaluating technical solutions and introducing new tools based on business needs.

Macgroup Technologies

Frontend Developer & Performance Engineer

2022 - 2024

Las Vegas, USA (Remote)

- Achieved 59% improvement in First Contentful Paint (3.9s to 1.6s) through data modeling optimization and architectural improvements.
- Maintained 97+ Lighthouse performance scores while implementing complex event-driven animations using GSAP and Framer Motion.
- Established performance monitoring systems to track and resolve frontend bottlenecks proactively.

Macgroup Technologies

Frontend Developer & Performance Engineer

2022 - 2024

Las Vegas, USA (Remote)

- Deep understanding of React framework internals, enabling optimization of rendering patterns and state management.
- Evaluated and implemented modern frontend tooling, improving build times by 40% through strategic webpack configuration.
- Developed scalable enterprise solutions supporting distributed team collaboration across three time zones.

Macgroup Technologies

Frontend Developer & Performance Engineer

2022 - 2024

Las Vegas, USA (Remote)

- Maintained 100% sprint delivery rate for 10 consecutive cycles through rigorous testing and code review processes.

- Resolved complex compatibility issues and production bugs, ensuring cross-browser functionality. Implemented automated testing strategies that reduced regression issues by 45%.

Cosmic Forge HealthNet2025 - 2025
Frontend Developer & Technical LeadLagos, Nigeria

- Led frontend development for healthcare platform with 60+ screens and 300+ reusable components using Next.js.
- Architected component library following atomic design principles, ensuring scalability and maintainability.
- Collaborated with backend team to ensure API alignment with frontend architecture, improving integration efficiency by 20%.

Cosmic Forge HealthNet2024 - 2025
Frontend Developer & Technical LeadLagos, Nigeria

- Implemented comprehensive testing framework with 300+ Vitest unit tests, reducing manual QA time by 35%.
- Established CI/CD pipelines for automated testing and deployment, enhancing code reliability.
- Designed responsive design system supporting desktop and mobile platforms with consistent UX patterns.

Diplomats Digital World2024
Lead Software Development Instructor

- Mentored 20+ developers through intensive 40-hour MERN stack bootcamp, achieving 90% project completion rate.
- Implemented Git workflow and code review processes, reducing feedback cycles from 5 days to 2 days. Resolved 120+ technical blockers through weekly office hours, demonstrating strong problem-solving and communication skills.
- Developed curriculum covering frontend best practices, testing strategies, and production deployment.

EDUCATION

Federal University of Lafia, Nasarawa State, Nigeria2024
Bachelor, Library and Information Science

- **GPA:** 4.46
- **Achievements:** Second-best student in faculty and department

CERTIFICATIONS

- Advanced Figma UI/UX Design (2025)
- Data Science and Machine Learning (In Progress, 2025)
- Continuously tracking emerging frontend technologies and frameworks

KEY ACHIEVEMENTS

- **Performance Champion:**Reduced First Contentful Paint by 59% through strategic optimization
- **Testing Advocate:**Implemented 300+ automated tests, reducing manual QA time by 35%
- **Architecture Leader:**Designed scalable component libraries used across multiple projects
- **Team Collaborator:**Maintained 100% sprint delivery across 10 consecutive cycles in distributed team
- **Mentor & Leader:**Successfully trained 20+ developers with 90% project completion rate
